Per e-mail

Dear Sir,

---

**SBS WATER SYSTEMS : DESIGN WIND SPEED OF 43m/s**

---

We refer to our discussions and our e-mail to you of 1 September 2016. This firm was advised that for some of your markets a design wind speed of 43 metres per second is a design requirement, vs the normal South African design wind speed of 40 metres per second.

We confirm that we have reviewed our design calculations for the ST Range of tanks using a design wind speed of 43 metres per second. The design meets with the design code requirements and is acceptable.

We assure you of our best attention at all times.

Yours faithfully  
J W MARTIN & ASSOCIATES cc
